## Executive Summary

Total Plugins  
**7**

Performance  
**50/100**

WordPress  
Version  
**6.8.2**

Overall Status  
**Needs  
Attention**

## | Active Theme

THEME NAME	DIRECTORY	VERSION	AUTHOR
Astra	Astra	4.9.0	Brainstorm Force

## Plugin Performance Report

PLUGIN	VERSION	TOTAL SIZE	IMPACT
--------	---------	------------	--------

<b>learndash-propanel</b> learndash-propanel	3.0.3	<b>5819KB</b> CSS: 240KB   JS: 5578KB	HIGH
---	-------	--	------

**Recommendations**

- Consider optimizing or replacing this plugin due to its large size impact.
- Enable conditional loading to prevent assets from loading on pages where not needed.
- Consider minifying CSS files and removing unused styles.
- Consider code splitting and lazy loading for JavaScript files.

<b>Elementor</b> elementor	3.28.4	<b>382KB</b> CSS: 271KB   JS: 110KB	HIGH
-------------------------------	--------	--	------

**Recommendations**

- Consider optimizing or replacing this plugin due to its large size impact.
- Enable conditional loading to prevent assets from loading on pages where not needed.
- Update to the latest version of the plugin to benefit from recent performance improvements and security fixes.

PLUGIN	VERSION	TOTAL SIZE	IMPACT
<ul style="list-style-type: none"><li>Consider minifying CSS files and removing unused styles.</li></ul>			
<b>sfwd-lms</b> sfwd-lms	4.21.1	<b>268KB</b> CSS: 224KB   JS: 44KB	HIGH
<b>Recommendations</b> <ul style="list-style-type: none"><li>Consider optimizing or replacing this plugin due to its large size impact.</li><li>Enable conditional loading to prevent assets from loading on pages where not needed.</li><li>Consider minifying CSS files and removing unused styles.</li></ul>			
<b>elementor-pro</b> elementor-pro	3.28.3	<b>123KB</b> CSS: 26KB   JS: 97KB	MEDIUM
<b>Recommendations</b> <ul style="list-style-type: none"><li>Monitor this plugin's performance impact and consider optimization if site speed is affected.</li></ul>			
<b>grassblade</b> grassblade	6.2.8	<b>73KB</b> CSS: 13KB   JS: 60KB	MEDIUM
<b>Recommendations</b> <ul style="list-style-type: none"><li>Monitor this plugin's performance impact and consider optimization if site speed is affected.</li></ul>			
<b>learndash-notes</b> learndash-notes	1.1.3	<b>11KB</b> CSS: 4KB   JS: 7KB	LOW

PLUGIN	VERSION	TOTAL SIZE	IMPACT
<b>astra-sites</b> astra-sites	4.4.15	<b>6KB</b> CSS: 0KB   JS: 6KB	LOW

Recommendations

- Update to the latest version of the plugin to benefit from recent performance improvements and security fixes.

PageSpeed Insights Summary

Mobile Performance  
**N/A**

Desktop Performance  
**N/A**

## | Site Issues & Fixes

A comprehensive report of detected issues and actionable recommendations.

### ! Detected Site Issues

#### Security Vulnerabilities

2 plugins are outdated, posing potential security and compatibility issues.

#### Heavy Plugins

3 plugins are consuming excessive server resources, slowing down your site.

#### Poor Performance Scores

Site performance is below optimal levels. Mobile: 0, Desktop: 0.

#### Poor Core Web Vitals

LCP (Infinitys) and other Core Web Vitals need improvement for better user experience.

#### No Caching

#### No Security Plugin

Caching is not implemented, which is crucial for website performance optimization.

No dedicated security plugin detected. Your site may be vulnerable to attacks.

## ✓ Recommended Fixes

### Secure Your Website

**HIGH PRIORITY**

Address security vulnerabilities by installing a dedicated security plugin and keeping all components updated.

#### Actionable Steps:

- Install and configure Wordfence or Sucuri Security.
- Run a full site scan to identify and remove malware.
- Update all outdated plugins and themes to their latest versions.

### Implement Caching & CDN

**HIGH PRIORITY**

Dramatically improve page load times by caching content and using a Content Delivery Network (CDN).

#### Actionable Steps:

- Install a caching plugin like WP Rocket or W3 Total Cache.
- Set up a CDN service such as Cloudflare to distribute your content globally.
- Configure minification and file combination settings within your caching plugin.

## Optimize Plugins

**MEDIUM PRIORITY**

Review and manage your plugins to reduce resource consumption and potential conflicts.

---

### Actionable Steps:

- Deactivate and delete any unused plugins.
- Investigate heavy plugins and find lightweight alternatives if possible.
- Regularly update all active plugins to ensure compatibility and security.

## Improve Core Web Vitals

**HIGH PRIORITY**

Optimize LCP, CLS, and other Core Web Vitals for better user experience and SEO rankings.

---

### Actionable Steps:

- Optimize images and implement lazy loading.
- Minimize layout shifts by setting image dimensions.
- Preload critical resources and optimize CSS delivery.
- Reduce JavaScript execution time and third-party scripts.

## Optimize Media & Database

**LOW PRIORITY**

Compress images and clean your database to further improve site speed and efficiency.

---

### Actionable Steps:

- Use a plugin like Smush or EWWW Image Optimizer to compress your media library.
- Install a database optimization plugin like WP-Optimize to clean up overhead.

- Serve images in next-gen formats like WebP for better performance.

## Install Essential Plugins

MEDIUM PRIORITY

You're missing 4 essential plugin categories that are recommended for a complete WordPress site.

### Actionable Steps:

- Install security plugin: Wordfence Security - Comprehensive security protection
- Install performance plugin: WP Rocket - Premium caching and optimization
- Install backup plugin: UpdraftPlus - Reliable backup and restoration
