## Plugin Performance Report

PLUGIN	VERSION	TOTAL SIZE	IMPACT
--------	---------	------------	--------

<b>learndash-propanel</b> learndash-propanel	3.0.3	<b>5819KB</b> CSS: 240KB   JS: 5578KB	HIGH
---	-------	--	------

Recommendations

- Consider optimizing or replacing this plugin due to its large size impact.
- Enable conditional loading to prevent assets from loading on pages where not needed.
- Consider minifying CSS files and removing unused styles.
- Consider code splitting and lazy loading for JavaScript files.

<b>Elementor</b> elementor	3.28.4	<b>382KB</b> CSS: 271KB   JS: 110KB	HIGH
-------------------------------	--------	--	------

Recommendations

- Consider optimizing or replacing this plugin due to its large size impact.
- Enable conditional loading to prevent assets from loading on pages where not needed.
- Update to the latest version of the plugin to benefit from recent performance improvements and security fixes.
- Consider minifying CSS files and removing unused styles.

<b>sfwd-lms</b> sfwd-lms	4.21.1	<b>268KB</b> CSS: 224KB   JS: 44KB	HIGH
-----------------------------	--------	---------------------------------------	------

Recommendations

- Consider optimizing or replacing this plugin due to its large size impact.
- Enable conditional loading to prevent assets from loading on pages where not needed.
- Consider minifying CSS files and removing unused styles.

<b>elementor-pro</b> elementor-pro	3.28.3	<b>123KB</b> CSS: 26KB   JS: 97KB	MEDIUM
---------------------------------------	--------	--------------------------------------	--------

Recommendations

PLUGIN	VERSION	TOTAL SIZE	IMPACT
<ul style="list-style-type: none"><li>Monitor this plugin's performance impact and consider optimization if site speed is affected.</li></ul>			
<b>grassblade</b> grassblade	6.2.8	<b>73KB</b> CSS: 13KB   JS: 60KB	MEDIUM
<b>Recommendations</b> <ul style="list-style-type: none"><li>Monitor this plugin's performance impact and consider optimization if site speed is affected.</li></ul>			
<b>learndash-notes</b> learndash-notes	1.1.3	<b>11KB</b> CSS: 4KB   JS: 7KB	LOW
<b>astra-sites</b> astra-sites	4.4.15	<b>6KB</b> CSS: 0KB   JS: 6KB	LOW
<b>Recommendations</b> <ul style="list-style-type: none"><li>Update to the latest version of the plugin to benefit from recent performance improvements and security fixes.</li></ul>

First Contentful Paint

### Additional Metrics

Total Blocking Time  
**84.5ms**

Speed Index  
**6.1s**

## | Site Issues & Fixes

A comprehensive report of detected issues and actionable recommendations.

### ! Detected Site Issues

#### Security Vulnerabilities

2 plugins are outdated, posing potential security and compatibility issues.

#### Heavy Plugins

3 plugins are consuming excessive server resources, slowing down your site.

#### No Caching

Caching is not implemented, which is crucial for website performance optimization.

#### No Security Plugin

No dedicated security plugin detected. Your site may be vulnerable to attacks.

### ✓ Recommended Fixes

#### Secure Your Website

HIGH PRIORITY

Address security vulnerabilities by installing a dedicated security plugin and keeping all components updated.

**Actionable Steps:**

- Install and configure Wordfence or Sucuri Security.
- Run a full site scan to identify and remove malware.
- Update all outdated plugins and themes to their latest versions.

**Implement Caching & CDN****HIGH PRIORITY**

Dramatically improve page load times by caching content and using a Content Delivery Network (CDN).

**Actionable Steps:**

- Install a caching plugin like WP Rocket or W3 Total Cache.
- Set up a CDN service such as Cloudflare to distribute your content globally.
- Configure minification and file combination settings within your caching plugin.

**Optimize Plugins****MEDIUM PRIORITY**

Review and manage your plugins to reduce resource consumption and potential conflicts.

**Actionable Steps:**

- Deactivate and delete any unused plugins.
- Investigate heavy plugins and find lightweight alternatives if possible.
- Regularly update all active plugins to ensure compatibility and security.

**Optimize Media & Database****LOW PRIORITY**

Compress images and clean your database to further improve site speed and efficiency.

**Actionable Steps:**

- Use a plugin like Smush or EWWW Image Optimizer to compress your media library.
- Install a database optimization plugin like WP-Optimize to clean up overhead.
- Serve images in next-gen formats like WebP for better performance.

**Install Essential Plugins****MEDIUM PRIORITY**

You're missing 4 essential plugin categories that are recommended for a complete WordPress site.

**Actionable Steps:**

- Install security plugin: Wordfence Security - Comprehensive security protection
- Install performance plugin: WP Rocket - Premium caching and optimization
- Install backup plugin: UpdraftPlus - Reliable backup and restoration
